

MyBathroomRefit

Your bathroom refit planner — access guide

Thanks for your purchase

Your planner is a web app, not a file to install — this means it works the same way on your phone, tablet or computer, and there's nothing to keep updated. Your link is below.

Your link

mybathroomrefit.co.uk/app/

Open it in any browser to start planning straight away. Everything you enter is saved on your own device automatically — there's no account, login or internet connection required after the first visit.

Add it to your phone's home screen

This turns the planner into an app icon you can tap open, complete with its own window — no browser bars in the way.

On iPhone (Safari)

1. Open the link above in Safari.
2. Tap the Share icon (the square with an arrow) at the bottom of the screen.
3. Scroll down and tap **Add to Home Screen**.
4. Tap **Add** in the top-right corner.

On Android (Chrome)

1. Open the link above in Chrome.
2. Tap the three-dot menu in the top-right corner.
3. Tap **Add to Home screen**, then **Add**.

On a computer (Chrome or Edge)

1. Open the link above.
2. Click the install icon at the right of the address bar (a small screen with an arrow), or open the browser menu and choose **Install app**.

A few things worth knowing

- Your data stays on your own device. Nothing you enter is uploaded anywhere, so it won't appear if you open the link on a different phone or computer.

- Because of that, it's worth avoiding clearing your browser's site data for mybathroomrefit.co.uk, as this will clear your saved plan too.
- Works with no signal once the page has loaded once, handy for a mid-refit trip to the tile shop.
- Bookmark the link as a backup in case you ever need to reinstall.

Any trouble getting set up, or a question about the planner itself, just get in touch:
